

Social media marketing assignment 1

Templates Today

DATA ANALYSIS

The relationship between white paper downloads and purchases

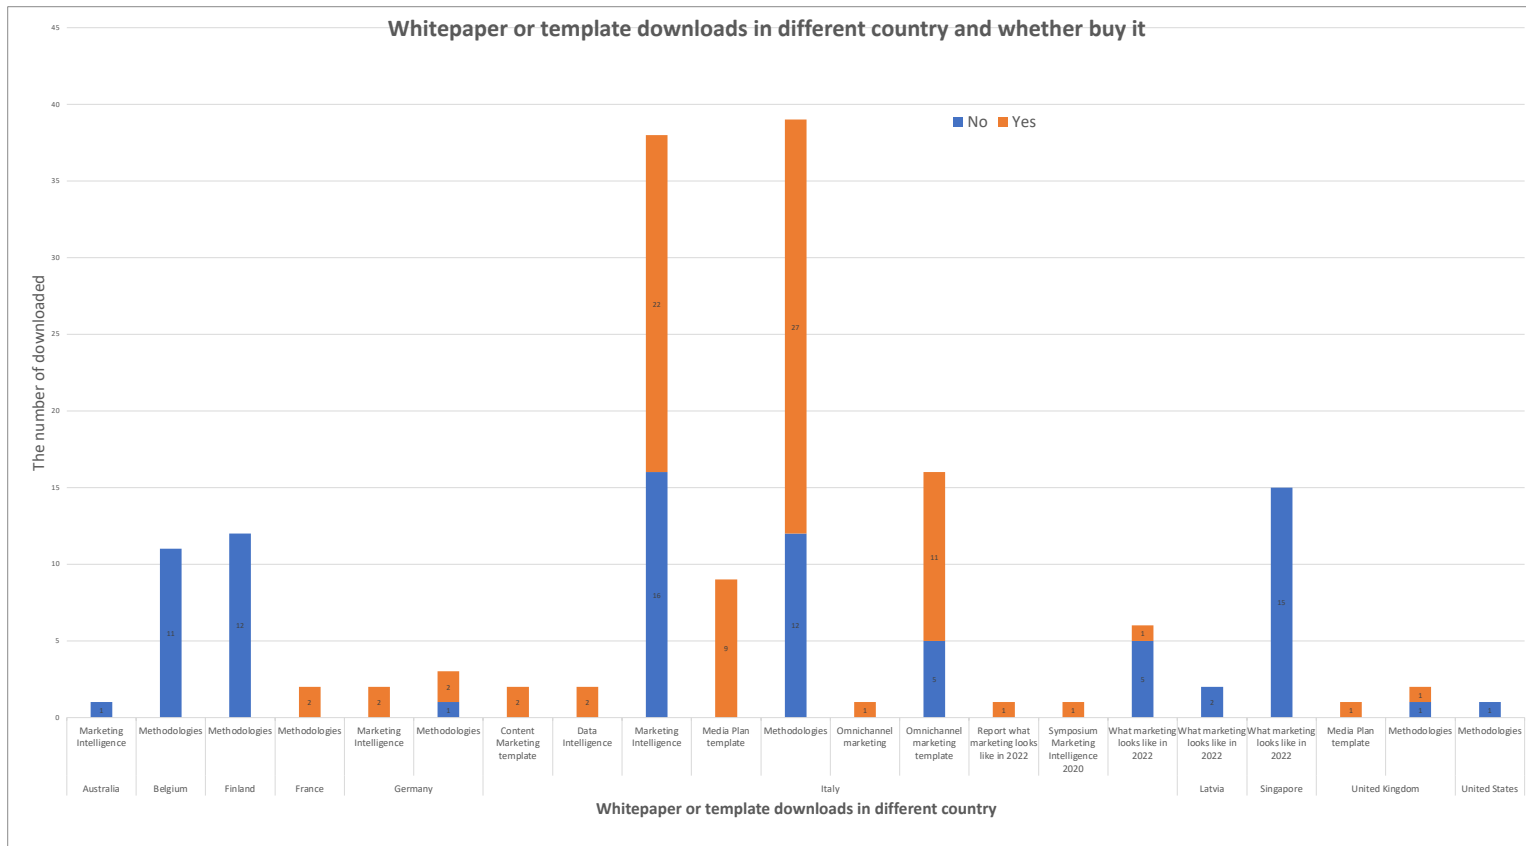

Fig1. Whitepaper or template downloads in different country and whether buy it

In Fig1, This shows the relationship between the number of whitepapers downloaded in different countries and whether the whitepapers downloaded are purchased. It indicates that the whitepapers downloaded are not necessarily purchased.

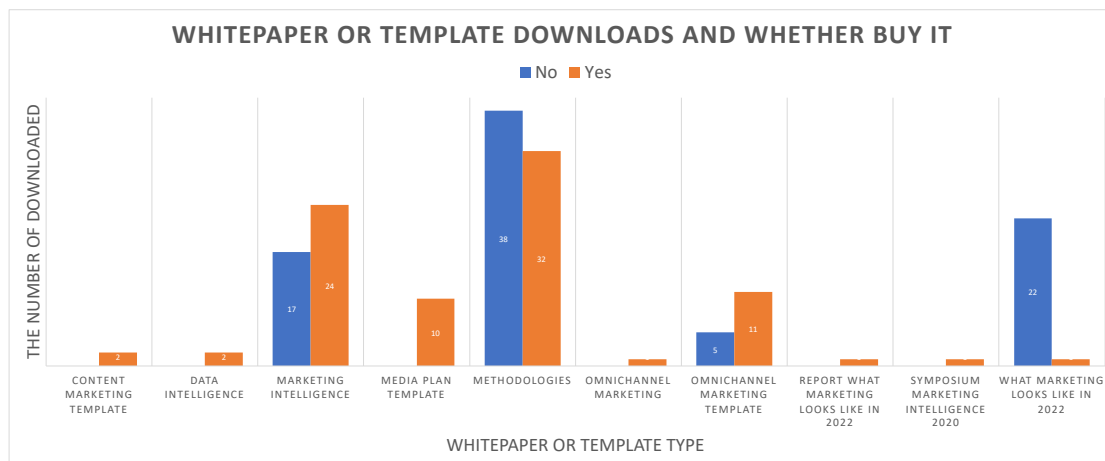

Fig2. Whitepaper or template downloads and whether buy it

As shown in the Fig2, we compare the number of white paper downloads to the number of white paper purchases. The more the number of white paper purchases, the more the number of downloads.

The whitepaper template mostly downloaded and service being bought

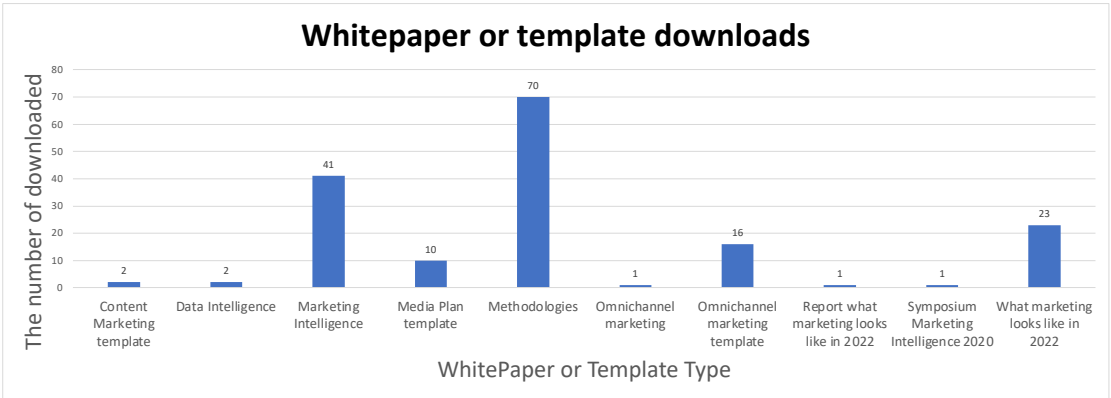

Fig.3 Whitepaper or template downloads

In Fig.3, through compare “The number of downloaded” of different types whitepaper, the documents downloaded mostly are “Methodologies”, “Marketing Intelligence” and “What marketing looks like in 2022”.

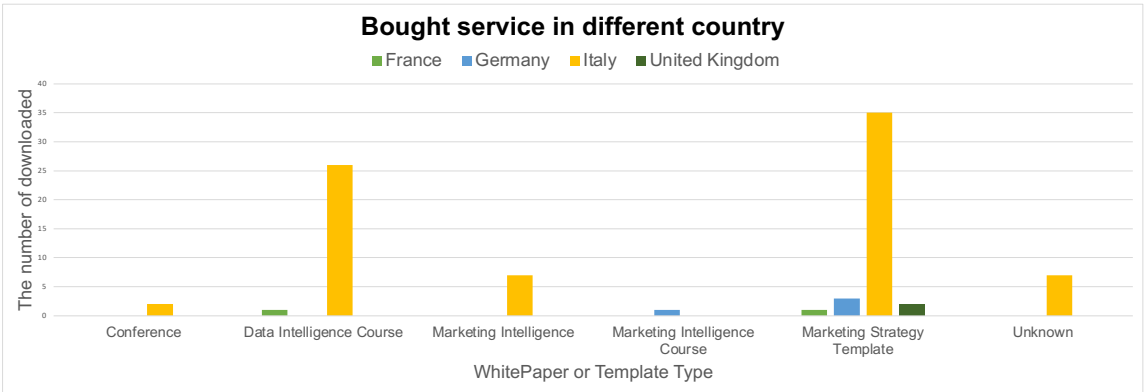

Fig.4 Bought service in different country

In Fig.4n, Contrasting the number of services being bought by different country, “Marketing strategy Template” and “Data Intelligence Course” are best sellers.

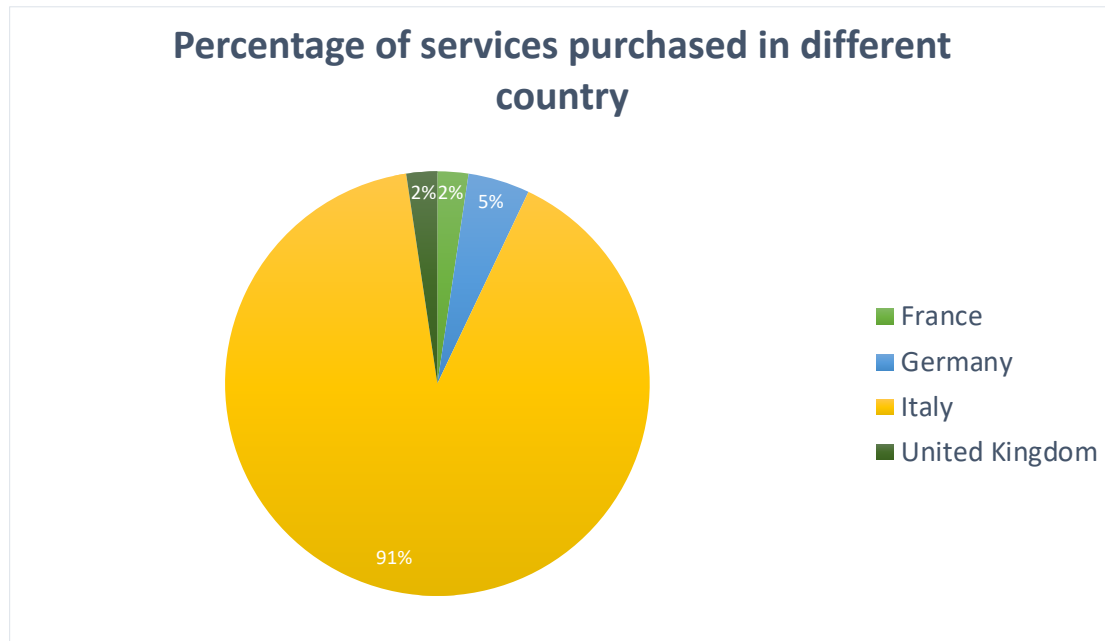

Fig.5 Percentage of services purchased in different country

In Fig5, of the five countries surveyed, Italy consumers are far more likely to purchase services, accounting for 91% of the total. Potential customers of Template Today are likely to be concentrated in Italy.

Users group analysis

Row Labels	customer Page/sessions	Average session length	Trading
In Market: Houses	4.13	1	132
Interests: Cars	16.73	4	268
Interests: CE	5.39	1	15
IT Job	8.61	2	1471
Mid-Management Business	24.29	6	4131
Travel	80.79	19	342
Grand Total	139.94	33	6359

Fig. 6 User portrait and user access

The data divides users into different categories like "IT job" et.al, according to the difference of users' access tendency, which allows us to better define the characteristics of users.

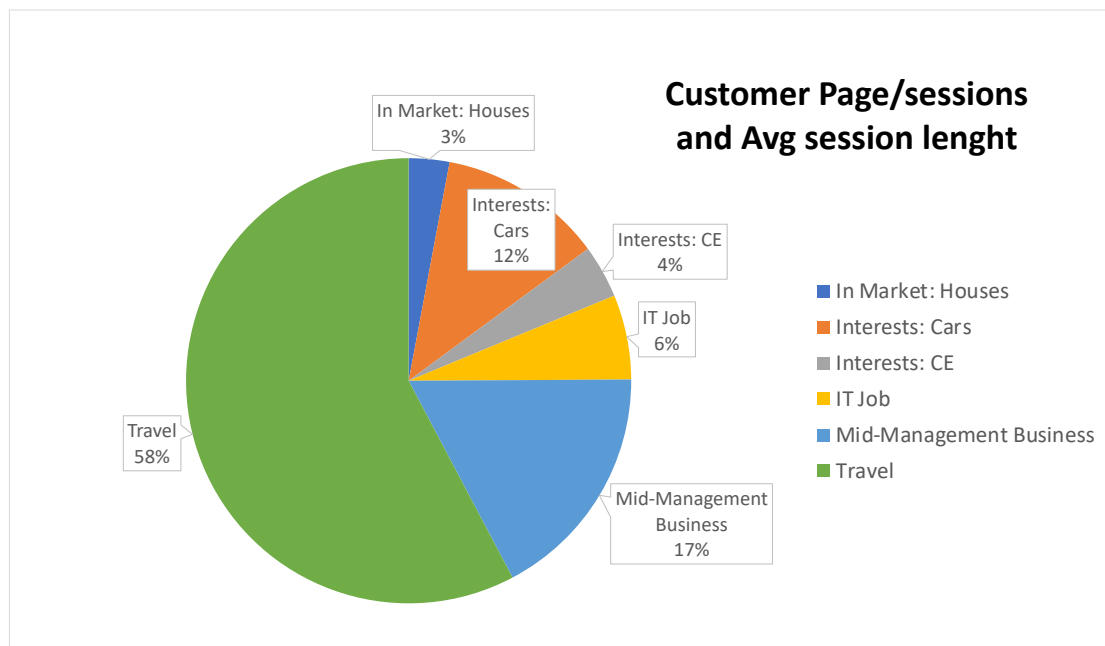

Fig.7 Customer Page/sessions

At the same time, in Fig7, according to the Customer Page/sessions and average session length, we can intuitively judge the highest user attention is the “Travel” sector.

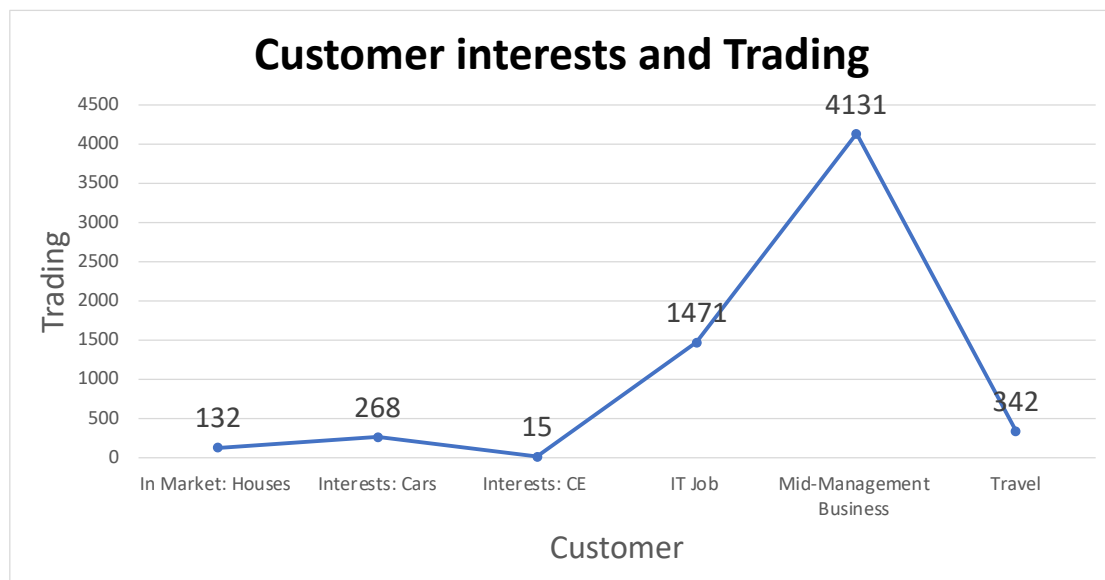

Fig8. Customer interest and Trading

In Fig8, we focusing on the difference in “Trading” of different Customer groups, and we find the "Mid-Management Business" and "IT Job" have the strongest consumption power.

Users group Persona

Persona 1: IT Job

Demographic info

- **Age:** 31
- **Income level:** 6000€
- **Location:** Italy
- **Education level:** Master

Communication

- **Channels:**
LinkedIn, technical forums (e.g. Stack Overflow), professional blogs, email subscriptions
- **Content types and formats**
Technical white papers, case studies, webinars, short video tutorials
- **Content themes and topics:**
Trends in artificial intelligence, data security, programming language updates, career certification guidelines

Bio

Technology-driven, pursuing career growth, focusing on industry certification, fast pace of work, often need to solve complex technical problems.

Frustrations (pain points)

Technology iteration speed is fast, it is difficult to continue to learn new skills; High working pressure, time fragmentation; Lack of authoritative resources to verify the usefulness of tools or courses.

Jobs to be Done

Quickly master new technologies to meet project needs; Enhance professional competitiveness through certification; Find efficient tools to optimize your workflow.

Quote

I need a new technical document that I can understand in an hour, not a lengthy theoretical manual

Motivations (goals)

Become the technical core of the team; Get promotion opportunities through authoritative certification; Balance work and study time.

Factors influencing buying decisions

Whether the content is certified by an industry authority (e.g. Microsoft, AWS); Whether the tool saves time directly; Whether there is a user real case endorsement.

Gains from my product

Access to instantly available technical methodologies; Enhance your resume through course certification; Use templates to quickly generate standardized reports.

Brands and influencers

Brands: GitHub, AWS, Coursera
Influencers: tech bloggers (e.g., TechLead), industry summit speakers

Persona 2: Mid-Management Business

Demographic info

- **Age:** 38
- **Income level:** 8000€
- **Location:** Italy
- **Education level:** Master

Communication

- **Channels:**
Intranet, industry report websites (such as Gartner), email newsletters, offline salons
- **Content types and formats:**
Management strategy white papers, executive interview podcasts, PDF toolkits, graphical data analysis
- **Content themes and topics:**
Management strategy white papers, executive interview podcasts, PDF toolkits, graphical data analysis

Bio

Results-oriented, need to balance team management with senior expectations, often facing budget constraints.

Frustrations (pain points)

Lack of landing management tools; The mismatch between senior expectations and team execution; Insufficient resources for data-driven decisions.

Jobs to be Done

Find a quantifiable management methodology; Improve team efficiency to achieve KPI; Get practical cases of industry benchmarking enterprises.

Quote

I need a solution that I can copy and paste directly into the weekly meeting, not a theoretical framework.

Motivations (goals)

Promotion opportunities through effective management; Establish reusable team collaboration processes; Use data to convince senior management to support decisions.

Factors influencing buying decisions

Whether the tool fits into existing workflows; Whether there is an endorsement from a leading firm (e.g., McKinsey); Can you provide customized analysis templates?

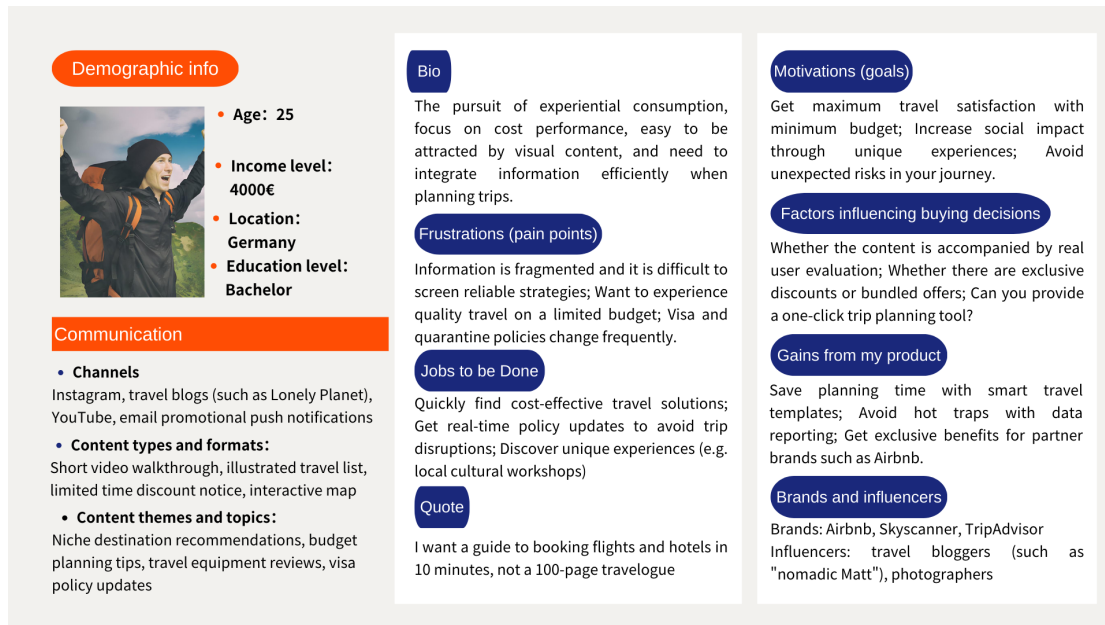

Gains from my product

Rapid development of strategic planning templates; Optimize decision making through data intelligence courses; Reduce cross-departmental communication costs.

Brands and influencers

Brands: McKinsey, Slack, Tableau
Influencers: Management book author (e.g. Simon Sinek), corporate transformation consultant

Persona 3: Travel

Marketing strategy

With 91% of all whitepaper and Service sales coming from Italy (Figure 5), we can judge that Italy users are the main consumer group of Templates Today. In order to ensure the concreteness and practicability of the strategy, we set the target group as Italy users.

In Fig9, the most popular social media in Italy are WhatsApp, Facebook and Instagram. Therefore, the campaign will be produced in Italian and launched on those platforms in collaboration with local KOL.

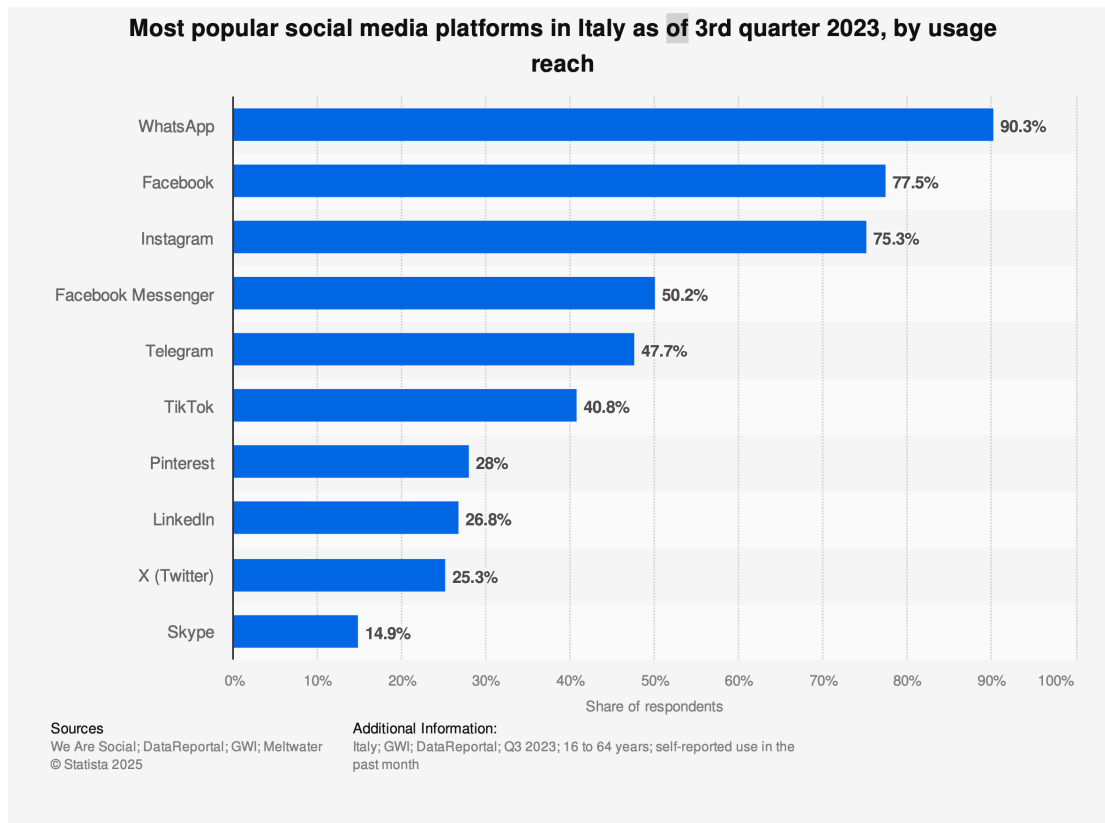

Fig 9. Most popular social media platforms in Italy,2023

In terms of user group classification, the consumer groups of the brand "Temple Today" mainly include people in the "IT Job", "Mid-Management Business" and "Travel". Among them, travel users spend the most time on the page, while IT and middle management users are more inclined to direct transactions (more spending power). Therefore, our targeted marketing strategy is to increase the purchase rate of travel users and simplify the transaction method for IT and middle management groups. For example, for travel users, we have launched more low-cost and lightweight products to lower the decision-making threshold of users. For IT and middle management users, we regularly recommend the service categories frequently purchased by users through user email and provide "one-click subscription" function. Reduce the time cost of such users and promote the increase of product sales.
